

**ABSTRACT OF THE DISCLOSURE**

A method for producing a toner comprising the step of coagulating at least one crystalline ester compound represented by Formula 1 and resin particles in an aqueous medium in the presence of an aluminum compound.

Formula 1

In the formula,  $R_1$  and  $R_2$  are each a carbon hydride group having from 1 to 40 carbon atoms which may have a substituent and  $n$  is an integer of from 1 to 4.
